Summer Camp Management System — Project Showcase

1. Overview

The **Summer Camp Management System** is a full-stack web application designed to help parents register their children for summer camp programs, manage camper profiles, make payments, and interact with the camp administration.

The project demonstrates:

- Full authentication system
- Form handling and secure data submission
- Admin dashboards
- Image uploads
- Database integration
- API development
- Clean UI/UX design

---

2. Live Demo

Frontend (Vercel):
https://summer-camp-client-side.vercel.app/

---

3. GitHub Repositories

Client Side:
https://github.com/est422/summer-camp-client-side/

Admin Dashboard:
https://github.com/est422/summer-camp-admin-dashboard

Backend API:
https://github.com/est422/summer-camp-backend-api

---

4. Key Features

✔️ User Authentication

- Secure login & registration
- JWT-based authentication
- Password hashing
- Email + password signup flow

✔️ Parent Portal

- Register new parent account
- Submit parent profile information
- Manage household details

✔️ Camper Registration

- Add camper details
- Upload camper images
- Store allergies, age, emergency contacts

✔️ Admin Dashboard

- View all parent submissions
- Manage camper registrations
- Review pending forms
- Real-time updates

✔️ Backend API

Built with **Node.js + Express + Prisma**

- Authentication routes
- Parent CRUD operations
- Camper CRUD operations
- Multer for image uploads
- MySQL database
- Clean MVC architecture

---

5. Tech Stack

Frontend

- React
- Next.js
- TailwindCSS
- TypeScript
- React Hook Form
- Vercel Deployment

Backend

- Node.js
- Express
- Prisma ORM
- MySQL
- Multer
- JWT Authentication
